

New York Police Officers Must Wage Far More Extensive War On Crime

GIVEN ORDERS BY CHIEF AT SECRET MEET

Commissioner Tells Aides He is Disatisfied With Their Ways

Associated Press
NEW YORK, N.Y., Aug. 29.—Two hundred high police officers received orders at a secret conference Friday that they must wage a far more intensive war on crime.

The meeting, presided over by Commissioner Edward P. Mulvey, was the first of its kind in his career called. It followed closely after "Lap Wolf," once chairman of the Mafia and now, drawn back under of New York, was taken out of a police lineup and charged with murder.

Among the 90 other persons paraded across the stage at police headquarters was Angelo Lupo (or Yano), brother of the gangster, Frank Yano, who was slain in Brooklyn three years ago after a reported fight with Alphonse Capone.

Commissioner Mulvey told his aides he was dissatisfied with some of their ways and warned them to meet them on a hurry. He said the secret orders:

1. All commanding officers' days off are abolished.
2. Patrolmen must be more diligent in walking their beats and must study the proper method of pursuing fugitives so as not to endanger the lives of innocent bystanders.
3. A greater zeal must be shown in questioning suspicious characters.
4. All policemen must regularly practice the use of firearms on police range.

"Patrolmen must be guarded" carefully and officers on such duty must wear their coats open and keep their hands on their hips, while the money is in their coat."

CATTLE SHIPMENTS INCREASE
MONTREAL, Aug. 29.—Cattle shipments from Canada to Great Britain during the period from Jan. 1 to Aug. 27, 1931, totaled 147,000, an increase of over 200 per cent when compared with the same of 1930, according to figures given out today by the local agent for the live stock branch of the department of agriculture.

MOORE ABOUT NAUTILUS

a temperature of 15 degrees below freezing was registered.

Note.—The freezing point of water is 32 degrees above zero Fahrenheit. This extreme condition of water between two layers of cold water has a considerable depth of water far beyond the Arctic. We know that the warm Gulf stream must empty into the Arctic Ocean. But we warmer and lighter waters about the Arctic Ocean. It has yet to be explained. Our latest that further investigation will bring new light on this strange, important problem, visually associated as it is with weather conditions along the American and North European coasts.

ANOTHER WARM LAYER

We believe that what we have sampled the water and temperatures near the bottom of the Arctic Ocean at this point, we would have found another warm layer.

Among our records are the findings from bottom samples of depths, fifteen fathoms deep at a point 2,000 miles (approximately 800 feet) below surface.

The up current is still two degrees below freezing and the upper portion of our metal craft is completely covered with ice. Chief Radio Operator Mayes had to climb up and scrape off the antenna before he could send the dispatch.

The general health of everyone aboard is good. We have been well fed. The amount of food is plentiful. The amount of food is plentiful.

NON-STOP AIR RACE ACROSS PACIFIC SET

Two Pairs of Flyers to Take-off From Tokyo Next Week

Associated Press Cable
TOKYO, Aug. 29.—A non-stop airplane flight of 4,000 miles across the Pacific to Seattle by two pairs of flyers will take place next week, their intentions announced Friday.

A prize of \$25,000 offered by a Japanese newspaper for the first non-stop flight between Japan and America is at stake.

But international complications may prevent on loan. Clyde Gwynne and Hugh Hendon, from participating. Arrived recently and lined heavily for taking photographs of Japanese fortifications while flying over the islands. They have been unable as yet to obtain Japanese government permission for the start in Japan of the Seattle flight.

Meanwhile, Don Moore and C. A. Allen, Californians, made preparations to take off from San Francisco beach 380 miles north of Tokyo. Having obtained the use of the monoplane, they failed to hear Harold Gatty and Harold Gatty last year and Thomas Ash this year from the same beach. Both they had repaired and improved the plane.

MOORE ABOUT DEMPSEY

counts of eight and five and when the round ended both were closed and his face badly battered.

Del Wille, Birmingham, expressed the view that Dempsey, given the right kind of opposition of the four rounds for Drimprey. He started off strong and landed a couple of home runs and doubled the hitting man, but he was out of the fight in the fourth round. Dempsey's face was cut and bleeding, the only thing that saved him from going down for the count was his holding and covering up during the last round.

The former heavyweight champion had plenty of speed and power in his punches, and his hitting ability. He made his opponents miss repeatedly and countered with perfectly timed blows.

number of the group as "negligent scoundrels."

"Everyone knows how the German crisis affected our own economic situation," he said, and explained that it had been decided to take emergency measures to protect London against any remotely similar crisis. In view of the importance of the situation, it was decided to call a meeting of the group.

The \$400,000 credit is distinct from the credit of the Bank of France, and was explained as in a measure supplementary to that credit.

American bankers expressed gratification at the explanation given by leading bankers in the three great financial capitals, and regarded the meeting as a landmark.

The credit became effective as of today, and it was explained that the United States government in the British government, the bankers had made no stipulations as to the use of it.

While no public participation in the United States portion of the credit is being offered, that of the French credit will be offered in the open market in the form of one-year notes.

Premier In 'Peg To Discuss Relief

WINNIPEG, Aug. 29.—Prime Minister R. B. Bennett hurried into Winnipeg this morning and to his third conference this week on peace and employment relief. Yesterday he met with Saskatchewan government heads at Regina where the relief program of the mid-province province was placed before him. Earlier in the week he considered Alberta's plans at Calgary.

BATON ROUGE, La., Aug. 29.—Governor Huey P. Long's plan to declare a holiday in production of cotton during 1932 today became a law that will be effective if States growing three-fourths of the cotton crop adopt similar measures. It was passed by the lower house, the bill went to the senate early this morning. It was passed in less than ten minutes without discussion by a vote of 29 to 6.

He had plenty of speed and power in his punches, and his hitting ability. He made his opponents miss repeatedly and countered with perfectly timed blows.

EDMONTON BOY PRIZE WINNER

L. Drebert Wins in Model Aircraft Contest

OTTAWA, Aug. 29.—Three Toronto boys and an Edmonton youth won first prizes in the fourth event of the second national model aircraft contest held Friday at Niagara field, by the model aircraft league of Canada.

Two Ottawa boys were winners of second and third prizes in the flying model outdoor junior class and the flying model outdoor junior class.

Albert Soliman came all the way from Vancouver, B.C. only to find when he reached Ottawa that his model airplane had been delayed in shipment somewhere between Vancouver and Ottawa. He was unable to construct another model in time for the contest so was given a position as timer in the event.

The following are prize winners: Flying model outdoor, junior class: 1. L. Drebert, Toronto; 2. J. R. Bennett, Toronto; 3. J. R. Bennett, Toronto; 4. G. W. Richardson, Montreal; 5. G. W. Richardson, Montreal; 6. G. W. Richardson, Montreal; 7. G. W. Richardson, Montreal; 8. G. W. Richardson, Montreal; 9. G. W. Richardson, Montreal; 10. G. W. Richardson, Montreal; 11. G. W. Richardson, Montreal; 12. G. W. Richardson, Montreal; 13. G. W. Richardson, Montreal; 14. G. W. Richardson, Montreal; 15. G. W. Richardson, Montreal; 16. G. W. Richardson, Montreal; 17. G. W. Richardson, Montreal; 18. G. W. Richardson, Montreal; 19. G. W. Richardson, Montreal; 20. G. W. Richardson, Montreal; 21. G. W. Richardson, Montreal; 22. G. W. Richardson, Montreal; 23. G. W. Richardson, Montreal; 24. G. W. Richardson, Montreal; 25. G. W. Richardson, Montreal; 26. G. W. Richardson, Montreal; 27. G. W. Richardson, Montreal; 28. G. W. Richardson, Montreal; 29. G. W. Richardson, Montreal; 30. G. W. Richardson, Montreal; 31. G. W. Richardson, Montreal; 32. G. W. Richardson, Montreal; 33. G. W. Richardson, Montreal; 34. G. W. Richardson, Montreal; 35. G. W. Richardson, Montreal; 36. G. W. Richardson, Montreal; 37. G. W. Richardson, Montreal; 38. G. W. Richardson, Montreal; 39. G. W. Richardson, Montreal; 40. G. W. Richardson, Montreal; 41. G. W. Richardson, Montreal; 42. G. W. Richardson, Montreal; 43. G. W. Richardson, Montreal; 44. G. W. Richardson, Montreal; 45. G. W. Richardson, Montreal; 46. G. W. Richardson, Montreal; 47. G. W. Richardson, Montreal; 48. G. W. Richardson, Montreal; 49. G. W. Richardson, Montreal; 50. G. W. Richardson, Montreal; 51. G. W. Richardson, Montreal; 52. G. W. Richardson, Montreal; 53. G. W. Richardson, Montreal; 54. G. W. Richardson, Montreal; 55. G. W. Richardson, Montreal; 56. G. W. Richardson, Montreal; 57. G. W. Richardson, Montreal; 58. G. W. Richardson, Montreal; 59. G. W. Richardson, Montreal; 60. G. W. Richardson, Montreal; 61. G. W. Richardson, Montreal; 62. G. W. Richardson, Montreal; 63. G. W. Richardson, Montreal; 64. G. W. Richardson, Montreal; 65. G. W. Richardson, Montreal; 66. G. W. Richardson, Montreal; 67. G. W. Richardson, Montreal; 68. G. W. Richardson, Montreal; 69. G. W. Richardson, Montreal; 70. G. W. Richardson, Montreal; 71. G. W. Richardson, Montreal; 72. G. W. Richardson, Montreal; 73. G. W. Richardson, Montreal; 74. G. W. Richardson, Montreal; 75. G. W. Richardson, Montreal; 76. G. W. Richardson, Montreal; 77. G. W. When the farmers joined the mob they were promised an easy road. In reality, they didn't have a chance of making any money.

So it is when you purchase a suit. All sort of promises are made, such as personality in ready-made or parade ready-made.

Here is where real thinking pays. Here clothes must be made for you.

SUCCESSFUL MEETING HELD BY PRESBYTERY

Red Deer Clerics Hold Gathering at Sylvan Lake

SYLVAN LAKE, Alta., Aug. 28.—The twenty-five members of the Red Deer Presbytery met at the Sylvan Lake Hotel for their annual meeting. The meeting was held from Tuesday August 27, to Thursday August 29. The moderator, Rev. T. M. McLean, opened the meeting with prayer and praise, after the reading of the minutes the meeting was continued and the business of the Presbytery began.

The minutes of the previous year were read and were presented from the changes and riders found within the bounds of the Presbytery. The reports of the students were read and the men returned to their various colleges. The Presbytery then turned to the consideration of the various problems of the Presbytery and the presbytery decided to extend to Mrs. M. Wylie their deepest sympathy in her loss. Rev. J. A. T. McLean of Sylvan Lake was elected to the moderator and home mission committee for the balance of the year in the place of Rev. T. M. McLean. The meeting was adjourned at 10:00 p.m. and the meeting was continued and the business of the Presbytery began.

Happy Landings!

Orville Wright, above, Dayton, O., inventor, with his late brother, Wilbur, started the world in flight. They made the first flight in an airplane on Kitty Hawk, N.C., in 1903, celebrated his sixtieth birthday on Aug. 19. A picture of the first airplane is at the left.

WORLD GRAIN FAIR WILL BE CARRIED OUT

Hon. Robert Weir Will Announce Final Decision on Regina Show

Regina, Sask., Aug. 29.—The twenty-third grain exhibition and conference will be held in Regina, July 29 to Aug. 12, 1931, has been cancelled.

Final decision on the show will be announced by Hon. Robert Weir, federal minister of agriculture following his return to Ottawa next week.

An official statement to this effect was given by Mr. Weir just before leaving Regina Friday after attending an all-day conference with Premier R. B. Bennett and the provincial cabinet.

During the day Saskatchewan's position of relief for the coming 12 months was placed before the Dominion premier by Premier J. T. A. Anderson.

Decisions reached in the relief conference are to be the subject of a detailed statement to be issued by Premier A. N. Sutherland.

An official statement was given out at 10:30 a.m. of the day from either of the two men, but the cancellation of the proposed journey of the Hon. A. C. Stewart, minister of highways, and Hon. J. A. Murray, minister of railways, labor and industries, to Regina, where they were to confer with Senator Gideon Robertson, minister of agriculture, was the only direction that a definite commitment as to the terms of the relief was made by Premier Bennett.

As a consequence of the conference the Saskatchewan relief committee members are to meet the provincial cabinet tomorrow afternoon at 2 p.m. in Ottawa, when a definite program of B.C. Gov't. Asking Outline Of Program Unemployed Relief

FAIL TO LOCATE AIRPLANE WRECK

Shir, Pontoon and Leggings Recovered

GLoucester, Mass., Aug. 28.—A search for the wreckage of a biplane which crashed into the Atlantic on July 27, failed to locate the wreckage of the plane. The wreckage of the plane was found in the Atlantic on July 27, but the wreckage of the plane was not found.

B.C. Gov't. Asking Outline Of Program Unemployed Relief

VICTORIA, B.C., Aug. 29.—The twenty-third grain exhibition and conference will be held in Regina, July 29 to Aug. 12, 1931, has been cancelled.

Final decision on the show will be announced by Hon. Robert Weir, federal minister of agriculture following his return to Ottawa next week.

OTTAWA, Ont., Aug. 29.—The meeting of the Ontario Federation of Labor Unions, J. H. McLaughlin, was postponed to a later date.

The meeting of the Ontario Federation of Labor Unions, J. H. McLaughlin, was postponed to a later date.

The Edmonton Bulletin STAMP COLLECTORS CLUB

FOUNDED 1929

Conducted by PHIL A. TELY

THIS CLUB IS CHAPTER NO. 6 OF THE AMERICAN AUTO PHILATELIC SOCIETY (an International Organization). Those interested in collecting air mail stamps are invited to join membership.

Knowing that stamp collecting is the hobby of hundreds of our readers, The Bulletin inaugurated its Stamp Club on Jan. 1, 1929. Any collector of stamps and those desiring to become one are welcome to membership. Because a stamp, addressed envelope, or airmail letter, is a piece of art, and a collector of stamps is a collector of art, the club is a club of art lovers.

Be sure to state your age, the number of stamps in your collection and in what stamps you are especially interested. Let Phil know if you wish to exchange duplicates with fellow members. Remember to enclose a stamped, addressed envelope.

This is the only club in the city that is open to all collectors. Address all correspondence to: The Editor, Stamp Collectors' Club, The Bulletin, Edmonton, Alberta.

Club Notes

Members to date 419

New Members to date 419

Airmail—A new set of three stamps in the series of airmail stamps, issued by the United States Post Office, was placed on sale on July 27, 1931.

New Zealand—Seven and ten shilling stamps have been issued for the Dominion, in design showing the scenery of New Zealand, similar to the 10-cent stamp issued last year.

Bulgaria—A set of five special postage stamps, issued by the Bulgarian Post Office, was placed on sale on July 27, 1931.

Airmail—A new set of three stamps in the series of airmail stamps, issued by the United States Post Office, was placed on sale on July 27, 1931.

IF IT WILL HELP ALBERTA THE EDMONTON BULLETIN IS FOR IT

SATURDAY, AUGUST 29

GOING ON ITS OWN

Announcement is made that the Alberta wheat pool is breaking away from the central selling agency, the Grain Elevator and Sales Department of its own, through which grain handled by the Alberta pool will be disposed of. The central agency is to continue to sell the remainder of Alberta pool wheat of the 1930 crop, but the new marketing agency will deal with grain of the present season.

Patrons of the Alberta pool, as of the pools in Saskatchewan and Manitoba, may either sell their wheat outright to the Grain Elevator and Sales Department, or pool it in the usual way. The sales department will hold a seat on the Winnipeg exchange and dispose of its grain through the regular market channels.

The reasons for breaking away from the central agency are not given. One reason may be that Alberta is more interested than the other prairie provinces in the development of markets in the Orient, and it may be that the Alberta pool can conduct a more active selling policy in that quarter than an agency whose chief concern must be the selling of wheat in Europe.

THE PRICE OF "GAS"

The Alberta Motor Association in launching a campaign against increase of a cent and a half per gallon in the price of gasoline. Whatever justification there may be for the increase, the association is of the opinion that it is out of line with the trend of the times.

The rise in price follows closely upon the heels of regulations which restrict the output from producing wells in the Turner Valley to forty per cent of their capacity. It comes at a time when there is more gasoline available than the world knows what to do with, and the restrictions are being urged to cut down production in the United States. And a time also when commodity prices generally are trending downward, and the cost of living wages are being slashed or have been slashed in every occupation and in nearly every business enterprise.

There may be reasons which justify this increase, or which even demand that it be made. The protest from the motorists organization should at least bring a statement from some authoritative source as to what these reasons are which warrant or require an advance in this particular time.

THE WAGES OF A PATRIOT

Ransay MacDonald understands now what it means to be a patriot, being those of his own household. While in other quarters there has been frank recognition and warm approval of his sacrifice he has been denounced as a traitor to the cause.

It is not by any means the first political leader to suffer the same penalty for doing what he conceived to be his duty. It is rather a favorite pastime in democratic countries to bewail the partisanship of public men, and to lament that so often they appear to put party before country.

But when one of these leaders comes out on a matter of principle or at a time of emergency and put country ahead of party, he usually gets paid in the language of abuse, tendered more abuse, and given what other relief may be possible to the destitute millions in the flood swept areas in China.

That at least would divert the atten-

tion of the western peoples from their own lesser hardships in this time of depression. There is misery and poverty and hopelessness there, to a degree that we in this continent know little of, thinking about it. It would help to re-establish a sense of their own good fortune if the peoples in America and Europe were to turn themselves in direct contact with the wholesale distress that has spread over that region on the other side of the earth.

In the elevators in Canada and the United States there is wheat that we do not know what to do with; sufficient to feed all the hungry in the valley of the Yangtze Kiang. And nothing can be much more certain than that—unless outside supplies are sent there in great quantities—a multitude perhaps as large as the whole population of this Dominion will perish from hunger. There must be some way of putting that surplus wheat within reach of the starving Chinese, by outright gift or by the extension of credits to their government.

It cannot be forgotten that this tragedy puts the western world on trial before the judgment of the eastern world, and that how we meet the situation will largely shape its attitude toward us. What, for instance—if we do nothing about it—will be the use of sending millions of bushels to the Yangtze area to preach a gospel which proclaims the relief of the needy to be a duty of the first order? And what will be the use, in the League of Nations or elsewhere, of professing our deep concern in the welfare of humanity if we demonstrate that it is not a matter of interest to us that millions of people starve to death?

Forty Years Ago

From the files of the Edmonton Bulletin

Telegraphic—
The census returns were brought down at Ottawa, and show the population of Nova Scotia to be 450,313. New Brunswick 321,594. Prince Edward Island 106,088. Quebec 1,488,388. Ontario 2,123,888. Manitoba 184,413. Saskatchewan and Alberta 81,687. British Columbia 92,767. Unorganized territory 32,186. Total for the Dominion 4,824,344.

It is predicted that in the Northwest block the territories will be given four members of the House of Commons, two from Assiniboia, and one each from Saskatchewan and Alberta. Also that the Territorial assembly will have 25 members.

Confidential sources connected with the Government, for a free use of Governor General's warrants was defeated.

Boydette put before the public accounts committee shows that the superintendent of the printing bureau collected \$12,060 out of firms to whom he gave contracts. He has resigned.

Census returns give Montreal's population as 216,680. Toronto 181,220. Ottawa 44,351. Halifax 39,566. Winnipeg 28,842. Victoria 16,641. Vancouver 13,683. New Westminster 6,641. Alberta 20,554. Assiniboia 30,283. Saskatchewan 31,146.

THIRTY YEARS AGO

R. Logan of Beaver Lake is in town this week. Meffer, the most eagerly settled in the Prince Albert district, has been in the city of grain in sight and no threatening outfit. The C.N.R. will be within hauling distance of Meffer this fall.

The Canada Permanent Assurance Corporation has opened a branch in the Imperial Bank Block, with C. Winkett Strathairn in charge.

Cranberry have been built this year at Red Deer and Innisfail.

Harvesters, unable to secure work, lodged in mid of the city.

The board of trade is endeavoring to secure a reliable report as to the probable yield of the oat crop in 1931. The board of trade has secured the C.P.R. for a reduction in rates to British Columbia.

TWENTY YEARS AGO

Victoria Liberals nominated W. H. White as their candidate for the House of Commons at a convention held at Vancouver.

Cannibals, N.Y.—Twenty-five people were killed here in a panic in 1910, during a movie picture film exhibition.

Dr. Donald Mann, an Edmonton visitor on Saturday, announced a grand project for a railway construction in northern Alberta by the C.N.R. The line to Peace River is to be continued as rapidly as possible.

TEN YEARS AGO

Winnipeg—The Dominion Trades and Labor Congress adopted a resolution calling for the permanent exclusion of Orientals from Canada.

At High Prairie the Edmonton board of trade excursion party was met by a delegation representing the associated boards of trade of northern points urging support by the Edmonton board of the project for a highway from the city to Grande Prairie.

Up to date the total loss by the city on the Portland bond deal amounts to \$24,438.48.

The Provincial department of agriculture has decided to give financial assistance to Alberta breeders who send animals to the Chicago International.

Writer's Cramp

By EDGAR A. GUEST

I'd like to write a clever line
To travel round the earth
That all who read it, rain or shine,
Would feel the glow of truth.

I'd like to write a line of truth
So polished and so clear,
That it would hasten falling youth
In times of doubt and fear.

I'd like to pen a brilliant line
In verse or epigram
So keen and truly pointed it
Would pierce the heart of man.

But I would rather write a line
So tender and so true
That those who know and realize
Would find their faith anew.

WHAT ABOUT IT?

Toronto Globe: Buffalo has become the greatest distributing port in the world, according to a report of the United States Shipping Board. It is a great asset to be located just across the line from Canada.

Ottawa Citizen: A story last week told of a farmer in Dakota who turned his turkeys loose on the grain-brokers and how the critics ate it: feathers off the turkey, wings, and head. The story, it is said, has been told, will have to look to its laurels.

Health and Diet Advice

By DR. FRANK MURPHY

MIRACLES OF THE MIND

There are many who are being freed of incurable and good results can usually be obtained, in a short time by using an eliminative treatment, which will cure, ordinarily termed miracles, are believed in by thousands of people, and have been told about ever since mankind learned the use of language. In some parts of the world today you will find springs in which it is said one can take a bath and be cured of almost any disease from dandruff to clubbed feet.

There are those in sacred altitudes which, it is rumored, the paralyzed one has only to touch in order to be able to walk again. Such stories are often written about in the daily press as the newspaper men have learned that this kind of story is always interesting to the reader. Some may believe, and some may scoff, but it will be interesting.

It is well to understand that all such phenomena, which are not totally explained, can usually be explained by the response which will bring to date with the investigations of physical and psychological phenomena. Disease only exists because there has been an interference with health. The interference is usually manifested by a congestion of a lack of functioning in some part of the body and the cause are completely mental and sometimes physical. It is the mind that when the mind is not properly exercised and one has not followed the proper course of development of metabolism will result and waste the realizable. Sometimes a condition of the blood stream is changed with waste products.

THE GARDEN

To look round our City Market any Saturday morning, during the next few weeks will give you some idea of the wonderful quantity and quality of our local horticultural products, and it would be difficult to imagine any area where similar production and quality is forthcoming in such a short period.

To a person who has given this matter considerable thought it would appear that we have nearly everything necessary in this direction to give us a great industry and a venture to suggest that there will be many tons of horticultural produce to be wasted while other parts of this Dominion would be thankful to get it.

There must be something radically wrong with our system when such

quantities exist and personally I feel sure that this matter could be organized in such a way that our wonderful climate could be taken greater advantage of and an export business created without much difficulty.

Apparently our famed the weatherman is determined that we shall have our share of moisture this year and we might take advantage of this by turning over every bit of our soil as soon as the crops are taken off. For by so doing we give the ground a better chance to absorb the moisture which is still needed in the subsoil. For I do not think we shall get so much warm weather from now on that this moisture will escape.

At this time of the year we should be using our energy in the clearing season and plan to overcome them next year and there are several means that require attention now.

Those who are thinking of planting young trees next month should prepare the ground as soon as convenient by digging it to a depth of not less than 20 inches and incorporating a generous amount of well rotted manure and bonemeal in the lower part.

limb of the soil. Do not let the roots come in direct contact with the soil, for this will cause them to rot. Dig the hole deeper than actually required, throwing back some of the soil and making this firm by treading it down, as the roots should be placed upon this firm foundation at such depth that the eyes of the plant will be well under the three inches below the surface of the soil when the plant is completed, and do not make the error of treading on the events when covering them or you will have a fine far next year's bloom in the ground.

Plants that are already established may now receive a mulch of well rotted manure and a few handfuls of bone meal will also be beneficial and should be well worked into the soil for a distance of a foot to 18 inches around the plant.

Those of my readers who have been growing roses should not apply any more fertilizer this season, but if possible, plenty of wood ashes may be worked into the surrounding soil.

Rose trees have received all the nourishment necessary for this season's production and our object now should be to ripen the wood that may yet be already formed, in order that it will withstand the winter and a little later I shall have something to show you as to what winter protection is required.

I find that while our citizens no doubt love to see their flower gardens and enjoy the many horticultural products that come from them, they apparently do not yet realize that the horticultural industry which does so much in this direction is worthy of a still more real support.

During the two seasons that the directors were obliged to remove this business from the city, they appreciated the more central location and the recent addition did not have the ground as soon as convenient by digging it to a depth of not less than 20 inches and incorporating a generous amount of well rotted manure and bonemeal in the lower part.

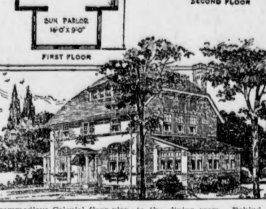

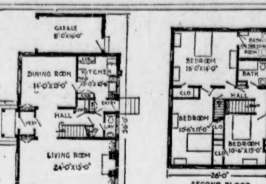

The above was an excellent one and the weather ideal, so it is difficult to understand why only about five per cent of our population has realized such a fine situation.

Speaking of rose trees, several readers have enquired as to the best place to purchase them, and I have already like to recommend any house in particular at this time, but may do so a little later.

There are three things being written, that roses raised in Canada should be sent to any imported from Holland or France, British providing they are grafted on a hardy stock.

Rocky Mountain has probably the

Spacious "Western-Colonial" Type

The commodious Colonial floor plan and the better, attractive 'Western-Colonial' exterior have been combined in this house.

The finished effect of the brick work and the stone is very attractive and the features of the front elevation.

Inside the house is entered around a main hall. An open fireplace, his place is right through the center of the house.

At the other side French doors lead to the dining room.

Individual climate of any province in the Dominion, yet as far as scenery, stock, the winners of Holland and Great Britain are not as well as many.

Address any enquiries regarding Japanese maidens to Mr. H. W. STILES, care of 'The Bulletin'.

places where even, etc., are successful. It is not in B.C. so there really does not appear to be any reason why we need to import this stock at all.

I understand that our dear neighbors at Vancouver are not only showing and in some of the classes the judges had a difficult task, the quality of the exhibit being on high and indeed all of which goes to emphasize what I have already said about our wonderful climate.

These flowers that are generally looked upon as being insignificant are apparently creeping into favor again and I have noticed this season quite a few gardens where the old time wall-flowers, forget-me-nots, and other old-fashioned flowers are being grown and well-to-do noble flowers as Dahlias, Gladioli, Bells, etc., are apt to take the eye more readily, the beauty and fragrance of the old-fashioned stock may find themselves, so long may they flourish.

Such work has been carried on in Japan for centuries. Dr. Tanaka will explain in detail the driver task which is generally looked upon by laymen as almost a super-natural act. Its purpose is to determine what effect nervous driving has on the health of women.

It is a well known fact that some Japanese women drivers can remain at a depth of 100 feet for two minutes and a half without the aid of oxygen or diving suits. Those drivers who are able to work longer under water are women below the age of 20.

Among other things, Dr. Tanaka will explain about the labor conditions of Japanese professional women and the psychological effort upon them of their work. He will speak on the subject as seen from the biological standpoint, dwelling upon such questions as the fatigue of women workers, the so-called 'neurotic' illness and disease, and the social significance of female labor. He will stress the necessity for protecting female workers, legally and otherwise.

Ministerial figures attending the undersea work of the women divers will be used by Dr. Cito Tanaka, president of the Kurashiki Labor Science Research Institute, before the International Industrial Medical Science conference which begins its sittings at Geneva, early in August.

Each week has been carried on in Japan for centuries. Dr. Tanaka will explain in detail the driver task which is generally looked upon by laymen as almost a super-natural act. Its purpose is to determine what effect nervous driving has on the health of women.

It is a well known fact that some Japanese women drivers can remain at a depth of 100 feet for two minutes and a half without the aid of oxygen or diving suits. Those drivers who are able to work longer under water are women below the age of 20.

Among other things, Dr. Tanaka will explain about the labor conditions of Japanese professional women and the psychological effort upon them of their work. He will speak on the subject as seen from the biological standpoint, dwelling upon such questions as the fatigue of women workers, the so-called 'neurotic' illness and disease, and the social significance of female labor. He will stress the necessity for protecting female workers, legally and otherwise.

CANADA INDUSTRY IN FIRM POSITION

This is Opinion of General Mgr. G.M. Truck Co.

Canada is well started on a period of industrial, industrial development, according to H. H. Henschel, president and general manager of the General Motors Truck and Coach of Canada, Wakefield, Ontario.

Mr. Henschel declared that Canadian industry has stood the annals of world wide business depression because it is built on a solid foundation, and is in a position to take advantage of every possible opportunity to expand its production, to support this, he pointed out that the Dominion's general industrial production expanded more 200 per cent during the World War and has maintained more than half of the growth.

"Canadian industry is in a firm position," said Mr. Henschel, "because it meets the specific needs of Canada, utilizes Canadian labor, develops Canada's natural resources and endeavors at all times to strengthen the Dominion's dominant position in the Empire."

"Canada has problems that are peculiar to the Dominion alone. Machinery of a different type than that used in other countries is necessary in many instances. General Motors recognizes this from the very start when it first entered into the building of trucks in Canada. With this end in mind, it has built up a thorough Canadian organization."

Canadian organization. Its engineering staff is composed of Canadians who have proved their ability to design trucks and coaches suited to Canadian hauling conditions. It employs

"When the 1932 cars are released to production, the body designers will be glad to have been co-operating with the chassis engineers to make bodies finer as a unit, as well as in body details."—Ray F. Anderson, Sales Engineer, Murray Corp. of America, Detroit.

"It seems that much of the motor truck service can best be performed under contractual arrangement or by a forwarding and distributing company that is engaged principally in the business of operating motor trucks."—A. H. Gossard, Middle West Union Company.

In all, a handy, handy sort of truck to the district room. Behind that is the well arranged kitchen. Up the back stairway in three blocks is the four if the family requires. The style is a spacious playroom for children.

And as for closets, make them everywhere. The kitchen sink is set beneath a window. There is a lavatory downstairs. Cabinets take the place of a pantry.

line output is sold in Canada and its selling force is made up of Canadians who thoroughly understand Canadian conditions."

Mr. Henschel pointed out that the General Motors Truck & Coach of Canada, Ltd. is the only truck company in the Dominion manufacturing a complete line of trucks in Canada and maintaining depots as located as to provide service anywhere in Canada north of 54 degrees.

Summarizing business conditions in Canada, Mr. Henschel predicted a continued readjustment during the remainder of the year, with gradual improvement and strengthening of the industrial and business fabric of the country.

"Four factors affecting vapor lock are: vapor pressure of the gasoline, design of fuel-line system, atmospheric temperature and altitude."—D. B. Brooks, Bureau of Standards, Washington, D. C.

The scientific measurement of delinquency is becoming easier of attainment.—"O. C. Bridgeman and R. W. Alford, Bureau of Standards, Washington, D. C.

Mr. Henschel declared that Canadian industry has stood the annals of world wide business depression because it is built on a solid foundation, and is in a position to take advantage of every possible opportunity to expand its production, to support this, he pointed out that the Dominion's general industrial production expanded more 200 per cent during the World War and has maintained more than half of the growth.

The commodious Colonial floor plan and the better, attractive 'Western-Colonial' exterior have been combined in this house.

The finished effect of the brick work and the stone is very attractive and the features of the front elevation.

Inside the house is entered around a main hall. An open fireplace, his place is right through the center of the house.

At the other side French doors lead to the dining room.

Individual climate of any province in the Dominion, yet as far as scenery, stock, the winners of Holland and Great Britain are not as well as many.

Address any enquiries regarding Japanese maidens to Mr. H. W. STILES, care of 'The Bulletin'.

places where even, etc., are successful. It is not in B.C. so there really does not appear to be any reason why we need to import this stock at all.

I understand that our dear neighbors at Vancouver are not only showing and in some of the classes the judges had a difficult task, the quality of the exhibit being on high and indeed all of which goes to emphasize what I have already said about our wonderful climate.

These flowers that are generally looked upon as being insignificant are apparently creeping into favor again and I have noticed this season quite a few gardens where the old time wall-flowers, forget-me-nots, and other old-fashioned flowers are being grown and well-to-do noble flowers as Dahlias, Gladioli, Bells, etc., are apt to take the eye more readily, the beauty and fragrance of the old-fashioned stock may find themselves, so long may they flourish.

Such work has been carried on in Japan for centuries. Dr. Tanaka will explain in detail the driver task which is generally looked upon by laymen as almost a super-natural act. Its purpose is to determine what effect nervous driving has on the health of women.

It is a well known fact that some Japanese women drivers can remain at a depth of 100 feet for two minutes and a half without the aid of oxygen or diving suits. Those drivers who are able to work longer under water are women below the age of 20.

Among other things, Dr. Tanaka will explain about the labor conditions of Japanese professional women and the psychological effort upon them of their work. He will speak on the subject as seen from the biological standpoint, dwelling upon such questions as the fatigue of women workers, the so-called 'neurotic' illness and disease, and the social significance of female labor. He will stress the necessity for protecting female workers, legally and otherwise.

Ministerial figures attending the undersea work of the women divers will be used by Dr. Cito Tanaka, president of the Kurashiki Labor Science Research Institute, before the International Industrial Medical Science conference which begins its sittings at Geneva, early in August.

PHILADELPHIA NATATOR CAPTURES TORONTO SWIM

BEATS CHOICE FIELD OF 35 IN FINE RACE

Margaret Ravor World's Professional's Women's Swim Champion

CANADIAN PRESS Staff Writer
TORONTO, Aug. 28.—Margaret Ravor, of the Philadelphia Athletic Club, today won the 100-yard Philadelphia swim race in the face of many difficult odds, and won the prize money of \$100 and a gold medal and a silver medal. She has won the event many times before, but this time she was up against a field of 35 other women swimmers. The race was held at the Philadelphia Athletic Club, and was the first of a series of races to be held in the city. Margaret Ravor, who is 28 years old, is a professional swimmer. She has won the 100-yard Philadelphia swim race many times before, but this time she was up against a field of 35 other women swimmers. The race was held at the Philadelphia Athletic Club, and was the first of a series of races to be held in the city.
